Scheer Academy

The Scheer Academy offers professional training for executives, managers and employees. Our many years of experience and our expertise in project management, process management, change management and IT management support companies in the development of their most important asset – their employees – and strengthens the development of their competitiveness and sustainability. The Scheer GmbH head office offers spacious and modern training facilities complete with large projection screen, modern sound system and IT training infrastructure. We would be happy to arrange your training at other Scheer facilities or in a location of your own.

About Scheer

As a consulting and software house, Scheer GmbH supports companies with the development of new business models, the optimisation and implementation of more efficient business processes as well as the reliable operation of their IT systems. The development of products and services is focussed in particular on the sector specific accompaniment of companies in their digital transformations. Customers profit from the in-depth expertise gained from consultancy projects and expertise in IT implementations with SAP.

Scheer Academy – Gained in practice for use in practice

Professional training for executives, managers and employees makes companies more agile and effective. Benefit from our many years of experience and expertise in project management, process management, change management and IT management to help develop the competitiveness of your company. Close cooperation between companies in the Scheer network enables the application of synergies from experienced consultants and trainers from Scheer GmbH, products and e-learning solutions from IMC AG and the research methods of the August-Wilhelm Scheer Institute (AWSi).

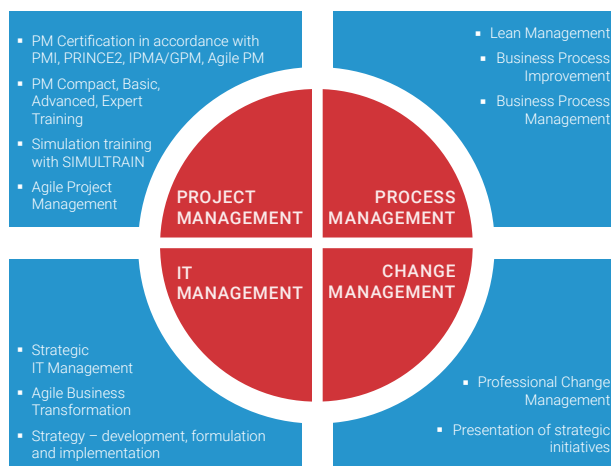

Sustainable Learning through Edutainment

We place great value on the feedback from our training participants which contributes to the continual and structured development of new topics for training and didactic concepts. It has, for example, led to a combination of **education** and **entertainment** in more and more training formats.

Diverse training formats for individual requirements

- Tailor made in-house training
- Open training with the possibility of exchanges between participants
- Individual consultancy for personnel development measures and career paths
- Development of E-Learning solutions
- Use of international „Best-in-Class products“ from our partners for E-Learning, blended Learning and simulation training
- Use of Scheer Products and Templates

Our Training Program:

What we offer:

- Course content working with real life practical examples
- Guidelines for quick implementations in practice
- Certified trainers with a minimum of 10 years practical experience who are also currently working in their area of expertise
- Additional input to training content through the personal and project based experience of participants
- Innovative didactic concepts
- Sustainable learning through edutainment
- Use of diverse media and tools
- Long-term learning support via moderated learning communities

This is what we stand for:
