

Press Release

Scheer Group starts Growth and Innovation Offensive with high-profile Experts

Dr. Wolfram Jost becomes Managing Director Software Products, Prof. Dr. Wolfgang Wahlster becomes Strategic Consultant for Innovations and Artificial Intelligence

Saarbruecken, April 15th 2019

With the appointment of the internationally renowned software architect Dr. Wolfram Jost to the management board of Scheer Holding, the product portfolio of Scheer GmbH, Scheer E2E and imc AG continues on its future-oriented path. With Prof. Dr. Wolfgang Wahlster, previous CEO of DFKI and scientific father of Industry 4.0, a globally recognized expert was won to further reinforce the areas of artificial intelligence and Industry 4.0.

Prof. Dr. Scheer is convinced, that the appointment of both high-caliber experts initiates important new impulses for the companies of the Scheer Group. "I am very glad, that Prof. Wahlster is willing to introduce his over 30 years of proven expertise in the area of AI as well as his international network into the corporate group. Dr. Wolfram Jost gained comprehensive global expertise as chief technology officer at Software AG over the course of the last ten years. I am confident that his product and market understanding will significantly advance our companies on their ambitious growth path. He will play a key role in the further development of all the corporate group's products."
